MOHAMMED NIHAL VP

AI ENGINEER — GENERATIVE AI, RAG & AI AGENTS

nihalvp321@gmail.com | +91 8113871435 | Kerala, India
LinkedIn: linkedin.com/in/mohammed-nihal • GitHub: github.com/nihalvp321 • Portfolio: nihalvp-portfolio.netlify.app

PROFESSIONAL SUMMARY

AI Engineer with industry experience building and deploying Generative AI applications, RAG systems, and AI agents using OpenAI APIs, LangChain, LangGraph, TypeScript, FastAPI, Supabase/PostgreSQL, and AWS. Experienced in enterprise software, backend development, workflow automation (n8n), and CI/CD. Focused on improving LLM response quality, latency, and token cost through prompt engineering and retrieval optimization. MCA with specialization in Artificial Intelligence, Machine Learning and Data Science.

TECHNICAL SKILLS

- **Generative AI & LLMs:** LLMs, RAG Pipelines, AI Agents, Prompt Engineering, Embeddings, Vector Search (Supabase/pgvector), OpenAI API, Claude API, LangChain, LangGraph
- **Languages & Frameworks:** TypeScript, Python, JavaScript, SQL, Dart, FastAPI, REST APIs, React, Flutter
- **Cloud & DevOps:** AWS (EC2), Supabase, PostgreSQL, GitHub Actions, CI/CD, Git, Docker fundamentals
- **Automation & ML:** n8n Automation, Custom OpenAI Nodes, Webhooks, Postman, Scikit-learn, Pandas, NumPy, NLP

PROFESSIONAL EXPERIENCE

Junior AI Engineer | Mite Technology

May 2025 – Present | Kerala, India

— Generative AI & Autonomous Agents

- Built and deployed enterprise AI solutions using OpenAI APIs, FastAPI, LangChain, LangGraph, Supabase, and AWS.
- Designed RAG systems utilizing intelligent chunking, semantic retrieval, and vector embeddings to deliver high-context answers.
- Developed autonomous AI agents with contextual memory, multi-step reasoning, and external API tool integrations.
- Tuned prompt templates and retrieval ranking, decreasing latency and optimizing token cost for production workloads.

— Automation & Enterprise Integration

- Automated enterprise workflows utilizing n8n, OpenAI APIs, REST endpoints, and custom webhook dispatchers.
- Built custom OpenAI integration nodes for n8n to connect CRM systems and enterprise data repositories.

— Deployment & DevOps

- Maintained production n8n workflows and server instances on AWS EC2 with uptime monitoring.
- Created automated CI/CD release pipelines via GitHub Actions ensuring zero-downtime microservice deployments.

CERTIFICATIONS & INDUSTRY CREDENTIALS

Artificial Intelligence & Machine Learning Graduate

Issued: Jun 30, 2025

Issuer: IBM (Innovation Centre for Education)
Official Credly Verification: https://www.credly.com/badges/c69791fc-ca3b-4185-aa19-fe45a1eb9578

KEY ENGINEERING PROJECTS

EKARBOT – AI Real Estate Assistant *[TypeScript, OpenAI, LangChain, RAG, Supabase, n8n, AWS EC2]*

- Architected a semantic RAG assistant aggregating CRM properties and Bayut listings into unified vector embeddings.
- Boosted retrieval accuracy by over 40% with multi-stage vector search and automated data ingestion on AWS EC2.

BiztrackPro – Enterprise ERP Platform *[TypeScript, Supabase, OpenAI, PostgreSQL, React, CI/CD, AWS]*

- Engineered backend APIs and AI copilot workflows for enterprise operations across Finance, CRM, and approvals.
- Automated continuous delivery via GitHub Actions ensuring resilient, scheduled microservice updates.

NeuroTrack – Parkinson's Disease Screening System *[Flutter, FastAPI, Scikit-learn, OpenAI GPT-4o Mini, Python]*

- Multi-modal screening classifying gait, vocal tremors, and spiral drawing tests paired with a GPT-4o Mini copilot.

EDUCATION

Master of Computer Applications (MCA) – AI & Data Science Specialization 2023 – 2025
Yenepoya University

Bachelor of Science in Computer Science (B.Sc) 2020 – 2023
Calicut University
